Please cancel claims 8, 10, and 19, amend claims 1 and 20, and add new claim 22, all as shown below.

1.   (Currently Amended): A system for extending online help, comprising:

a help system that processes documentation content upon import of an integrated development environment extension, wherein the help system includes context-sensitive help topics; and

a help display, wherein search capabilities and table of contents are automatically updated after the integrated development environment extension is imported, wherein the help display is configured to display content in a web browser;

wherein the documentation content can support delivery of help for a particular component in a single archive file

wherein the help system includes a control and a control property.

2 – 8. (Cancelled)

9.   (Previously Presented): The system of claim 1 wherein the help system is integrated with an extension installation mechanism.

10 - 11.   (Cancelled)

12.   (Previously Presented):   The system of claim 1 wherein the help display is externally controllable.

13 - 14.   (Cancelled)

15.   (Previously Presented):   The system of claim 1 wherein the context-sensitive help topics are organized by a context ID.

16.   (Previously Presented):   The system of claim 15 wherein the context ID is a fully qualified Java class.

17.   (Previously Presented):   The system of claim 15 wherein the context ID is a fully qualified name from a non-Java resource.

18.   (Previously Presented):   The system of claim 1, wherein the documentation content is in HTML or XML format.

19.   (Cancelled)

20.   (Currently Amended):   The system of claim 1 ~~19~~, wherein the archive file is a JAR file.

21.   (Previously Presented):   The system of claim 1, wherein integrated development environment widgets, controls, and control properties are associated with documentation topics that can be automatically displayed in the help system when requested by a user performing a context-sensitive help gesture.

22.   (New): The system of claim 1, wherein when a control is installed, documentation for the control can be integrated with the help system during the installation of the control.
